Lineage Power and SynQor Settle Patent Litigation

MARSHALL, TX--(Marketwire - Aug 18, 2011) - Lineage Power Corporation today announced a definitive settlement of the *Lineage Power v. SynQor* patent litigation action pending in the Eastern District of Texas. Terms of the settlement are confidential. Originally filed in March of 2008, in this consolidated action Lineage Power had sued SynQor alleging infringement of six of its patents, and SynQor had counterclaimed alleging infringement of three of its patents. Each party had also asserted various affirmative defenses and counterclaims.

In the settlement, the parties have agreed to mutual releases and a dismissal with prejudice of all claims asserted against each other in the litigation. The case was dismissed by the judge with prejudice. Lineage Power is satisfied with the settlement and remains committed to [vigorously defending](#) its intellectual property portfolio.

This settlement is not related to the *SynQor v. Artesyn* patent infringement case brought by SynQor against the AC-DC and DC-DC power conversion industry in the Eastern District of Texas. All five of SynQor's patents involved in the *SynQor v. Artesyn* case are involved in reexamination proceedings before the U.S. Patent and Trademark Office (USPTO). The USPTO has currently issued preliminary rulings invalidating all of the claims asserted by SynQor at trial. Lineage Power continues to vigorously pursue all avenues of recourse in this action.

About Lineage Power

Lineage Power traces our nearly 100 year heritage of innovation to Bell Labs. We deliver reliable and intelligent power conversion solutions for cloud computing and mobile internet infrastructure with energy-efficient AC-DC power supplies, DC-DC circuit board mounted power modules, telecom energy systems, DC datacenters, and custom power products backed by local field expertise in 25+ locations worldwide. Designed for decades of non-stop operation, the high-availability Total Efficiency™ architecture DC power conversion solutions enable voice, video and data communications while assuring investment protection, total system efficiency, and significantly reduced total cost of ownership. Our customers include leading U.S. telecom service providers, such as AT&T, Verizon Wireless and Verizon, and leading global OEMs, such as Alcatel-Lucent, Cisco, Ericsson, Hewlett Packard, Huawei, Juniper Networks and Oracle. More information about Lineage hardware, software, services and training is available at www.lineagepower.com.
